

What is Low Vision?

Low vision is when your eye sight is impaired, making it difficult to carry out everyday tasks with ordinary spectacles or contacts lenses.

This can be caused by various eye problems.

There are various visual aids which can be used to enhance your remaining vision, according to your needs.

How can I book an assessment?

If you have had an eye test, and your vision can't be improved with optical, medical or surgical means, then you may be suitable for a low vision assessment.

You can book an appointment by contacting Lunettes Opticians at one of our branches.

What you can expect from Lunettes Low Vision Services?

- An assessment of your lifestyle and visual requirements
- An assessment of visual function
- Suitable visual aids to improve your sight. These may be spectacle mounted, hand held or stand magnifiers
- Advice on non-optical aids that may help in everyday living
- Training and advice in order to help maintain as much independence as possible
- Referral to rehabilitation services for a home assessment or other healthcare professionals if necessary

Low Vision Services at Lunettes Opticians

This is a private arrangement, as part of our enhanced optical services offering.

Please feel free to contact one of our branches to discuss fees.

We are also happy to accept referrals for our private services from GP's, hospital eye departments, optometrists, blind societies and other rehabilitation services.

Can't I just buy a magnifier?

Yes, you can– but it is always best to have a Low Vision assessment first to make sure that you are buying the best aid to suit your needs.

- Hand & stand aids
- Spectacle mounted aids
- Electronic aids
